

London Fire Stopping

London Fire Stopping provides modern fire stopping finishes to the UK construction industry. Quality and innovation. We harness the best products and work with great people...

London Fire Stopping

OUR APPROACH.

London Fire Stopping uses a realtime dashboard of online tools to deliver a state of the art service to its customers.

We adopt a problem-solving methodology which enables us to deliver a high degree of client satisfaction and our ability to flex our installation methods, working out of core building hours if needed, ensures our clients can concentrate on their business without disruption. Communication, experience and values drive our business and our teams. London Fire Stopping delivers a service with value engineering, a close understanding of the client and a close and effective partnership with its supply chain.

OUR VALUES.

London Fire Stopping. From concept through to completion. The estimating team provide detailed cost planning alongside additional added value engineering services. Our procurement department ensures purchasing is always competitive through our key suppliers and our supply chain managers deliver the right staff and technicians time-critically.

Our Company values are vital to the overall success of building our business.

Our team and partners have decades of experience in delivering professional services to the UK construction industry. We harness the best products and couple it together with great people, all supported by a team of professionals.

ACCREDITATION.

London Fire Stopping is accredited by IFC Certification Ltd

IFC Certification Ltd is a UKAS accredited and internationally recognised provider of high quality and customer focused third party certification.

IFC Certification Ltd is a UKAS accredited certification body and is a Notified Body (No. 1720) under the Construction Products Directive.

PARTNERSHIP.

We work in partnership with our customers to ensure that we provide appropriate, cost-effective, fully designed and engineered fire stopping systems. We install fire stopping solutions that are tailored to each building.

Our systems range from simple joint and gap sealing to more complex movement and expansion joints.

Fully Endorsed by Building Control, Approved Inspectors and Building Insurers.

Fire stopping Solutions Tailored to your needs and existing designs - refurbishment, building maintenance, change of use and new build.

INSTALLER CERTIFICATION SCHEMES.

We ensure that certificated and tested products are installed within the approved field of application by skilled and competent operatives to give confidence to specifiers, users, occupiers, owners and enforcement bodies.
